Interact & Amaze on the go

The prestop All-in-One flight case is perfect for use at events and trade fairs. Transport your (touch)screen easily and safely. You are ready for use in just a minute. With the built-in electric lift you can both tilt and adjust the height of the screen. There is enough space for internal hardware, for example a mini PC. External connections with power and network are easily accessible. This flight case has an extra reinforced frame with detachable top cover. For example, you can convert the top cover to a standing table that you can use for extra storage. There is more storage space available with the two separate handy shelves. Ideal for an efficient setup on the exhibition floor. The entire unit can stay on your booth.

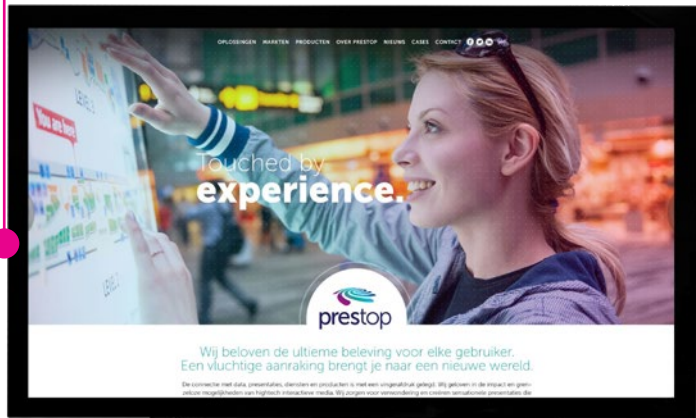

Unique Selling Points

Easy electric adjustment

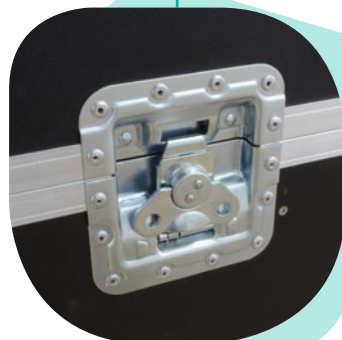

Top cover can be used as bar table

Cable management

External inputs

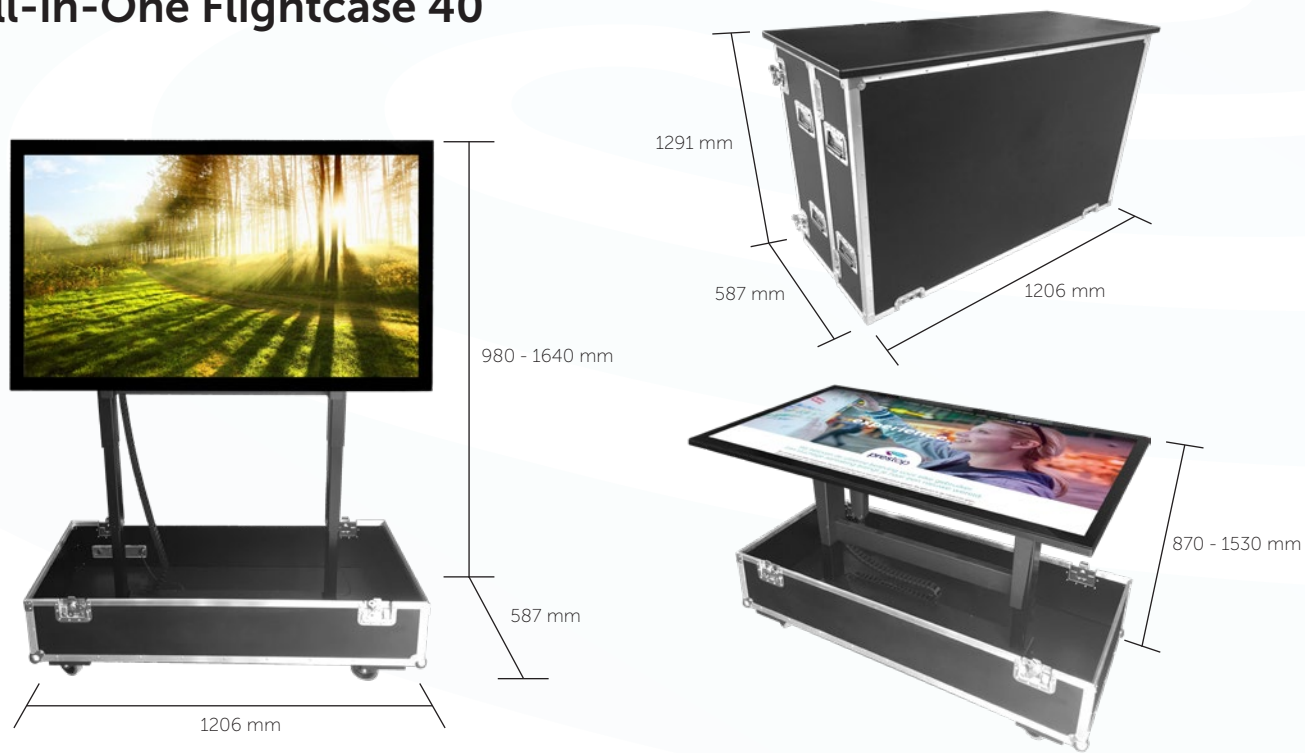

Tough, sturdy locks

Lockable wheels for optimum mobility

prestop

All-in-One Flightcase

Prestop integrates PCAP touch foil from 10" to 85" on glass in every size and shape. With our own cleanroom and our experience, we supply to many screen manufacturers, architects, interior builders, AV companies and end users who are interested in customized interactive displays. We can laminate PCAP technology on glass up to 12 mm thickness.

- Certified cleanroom (ISO 14644)
- Dutch design
- Assembled in The Netherlands
- Transport and installation worldwide

Prestop is your specialist for interactive experiences since 1993!

We develop and produce touch tables, information kiosks, touch screens, outdoor kiosks, industrial solutions and video walls. Prestop is also specialized in custom projects.
